

# MODULAR<sup>TM</sup> MAST SYSTEMS

an **UPSHOT** product

REDUCED COSTS

OFF THE SHELF

FAST INSTALATION

LOW ENVIRONMENTAL IMPACT

REUSABLE

CLIMBABLE

RFID TAGGED

INCREDIBLY STRONG

EASY TRAINING

MADE IN UK

EASILY TRANSPORTED

"A real industry  
game-changer"

James Pickance  
CEO Upshot UK

## A REVOLUTIONARY NEW MAST SOLUTION

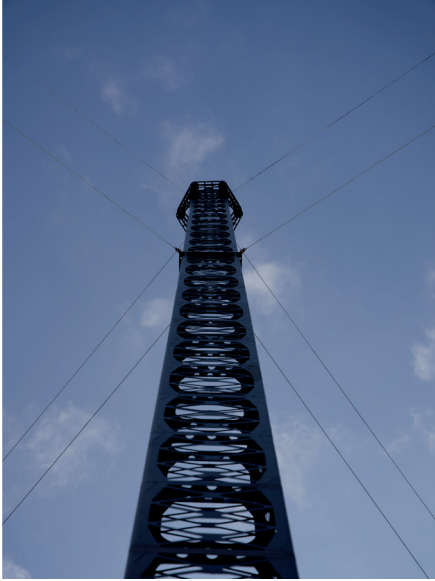

"The world's first genuinely sustainable 'off-the-shelf' temporary and permanent modular mast design that offers a more cost-effective, flexible, robust, secure and environmentally friendly alternative to rip and replace."

temporary | permanent | high-security

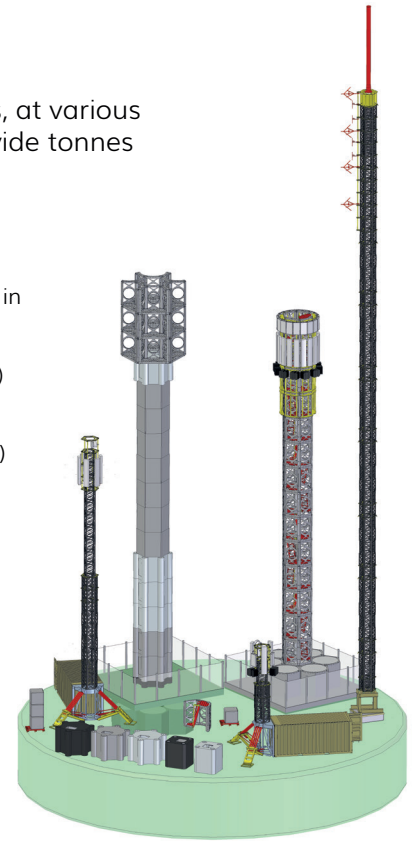

## THE M1 CONCEPT

Our innovative new modular mast system uses a limited number of components, at various scales, to provide an infinite number of configurations. These mast systems provide tonnes of headload capacity.

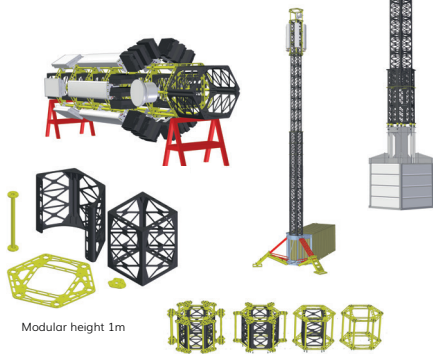

- Orders facilitated in hours not weeks
- A Customer ready stock allows masts to be in transit in hours
- System-1 Masts (MMS TEMPORARY RANGE) are designed for temporary applications.
- System-2 Masts (MMS PERMANENT RANGE) are designed for permanent installations.
- Low environmental impact
- RFID tagged
- Reusable, reconfigurable and resalable
- Easy training & support
- Low life-cycle cost
- Designed and made in Britain

## THE M1 OPTIONS

### MMS TEMPORARY

A climbable & portable system manufactured from steel three times the normal strength for masts

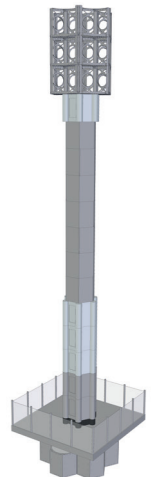

### MMS PERMANENT

### MMS SYSTEM HS HIGH SECURITY

DESIGNED FOR PERMANENT INSTALLATIONS – Modular height 2m

Expandable, full access, vertical and horizontal connectivity, with a 25 year lifespan

A full 24 page brochure is available via the product website below and we have a demonstration mast at our factory in Derbyshire and can also show you example installations by appointment only.

Upshot also has offices in London and Lymington, Hampshire with representatives around the world. In the first instance please contact James Pickance for more information.
